

## Corale

### Technical features

|                            |                                     |
|----------------------------|-------------------------------------|
| colour                     | : 725 - 744                         |
| production method          | : tufted                            |
| pile material              | : 100% pure new wool                |
| pile height                | : 40 mm                             |
| pile weight / m2           | : 3200 gram                         |
| total weight / m2          | : 4700 gram                         |
| number of colours          | : 20                                |
| maximum size without seams | : 450 cm width, length unlimited    |
| cleaning                   | : professional cleaning recommended |
| yarn design                | : Liset van der Scheer              |
| design and colour          | : Christiane Müller                 |

### Durability

Wool has a natural elasticity and is also naturally resistant to dirt. Corale has been tested by TNO and is suitable for the private market. This rug can be used with under-floor heating.

### Fire safety

Corale is made of 100% pure new wool, which is naturally flame retardant.

### Maintenance

- It is important to vacuum your rug at least once a week to prolong its durability. The most effective way to remove dirt and dust is with the furniture cleaning attachment provided with your vacuum cleaner. A vacuum cleaner with a standard nozzle tends to remove less dirt and dust.
- Never use a rotating vacuum brush on this quality; this will permanently damage your rug.
- Vacuuming a new rug will produce fluff, but this is temporary. This fluff does not affect the quality of your rug.
- The ideal air humidity for wool is around 50%. Please note that if the air humidity is below 50%, the material becomes dry and its natural elasticity will decrease.
- In order to prevent wool from drying out, we recommend misting your woollen rug with water regularly.
- If rubber soles are frequently walked over a woollen rug, it will wear quicker, especially if rotating or shifting movements are consistently made in one place.
- In order to prevent heavy use on one particular location, we recommend turning your rug around once in a while.

Due to our use of natural materials, slight colour differences may occur.
